

Daniel Fabricant, PhD

*Vice President of Scientific and Regulatory Affairs
Natural Products Association*

Dr. Fabricant is the Vice President for Scientific & Regulatory Affairs for the Natural Products Association. Dr. Fabricant has an extensive background and experience in Pharmacognosy/natural products research, analytical chemistry, health policy and an in-depth knowledge of regulatory affairs, covering the legal and technical aspects of marketing natural products, including provisions relating to safety, labeling, advertising and good manufacturing practices (cGMP). In his current role he directs the association's GMP Certification Program, the NPA ingredient testing program, the Association's Natural Certification program and Trulabel program, and NPA's participation as a subcontractor for the ODS NIH/NLM Dietary Supplement Label Database feasibility study. He obtained his Ph.D. in Pharmacognosy at the University of Illinois at Chicago under the tutelage of renowned professor Norman R. Farnsworth.
