

**Marguerite Klein, M.S.**  
*Health Science Administrator*  
*Office of Dietary Supplements*  
*National Institutes of Health*

Marguerite Klein, M.S., is the director of the Botanical Centers Research (BRC) Program of the Office of Dietary Supplements (ODS) at the National Institutes of Health (NIH). The BRC Program advances the scientific base of knowledge about botanical safety, efficacy, and biological action. She also works with the director of ODS's Analytical Methods/Reference Materials (AMRM) Program to expand the program and integrate components of the BRC and AMRM Programs. The AMRM Program promotes development of validated analytical methods and reference materials for dietary supplement constituents for use by industry, regulatory agencies, and clinical researchers. In addition, she works to address challenging issues in research (e.g., soy clinical studies, probiotic safety) in order to improve the integrity of dietary supplement research. Ms. Klein's academic training includes health education, clinical trials methodology, and nutrition. She received her graduate degree from the Tufts University School of Nutrition.
