

## **James Louis Mills, M.D., M.S.**

***Senior Biomedical Research Service Scientist  
Eunice Kennedy Shriver National Institute of Child  
Health and Human Development  
National Institutes of Health***

James Louis Mills, M.D., M.S., is a senior biomedical research service scientist in the Epidemiology Branch of the Division of Epidemiology, Statistics, and Prevention Research (DESPR) at the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). Dr. Mills conducts research in the etiology of birth defects. He has a particular interest in genetic and nutritional causes for birth defects. Much of his research has been in the area of folate and neural tube defects. Prior to his current position, he was chief of the Pediatric Epidemiology Section of DESPR and a senior investigator at the NICHD. He received his B.A. in history and premed and his M.S. in epidemiology from the University of Pennsylvania and his M.D. from New York Medical College.
